

NATIONAL UNIVERSITY MANILA
COLLEGE OF EDUCATION, ARTS, AND SCIENCES

FIRST TRIMESTER DAILY LESSON LOG
S.Y 2026- 2027

Name of Teacher		Chazter Troy D. Jumarang	Week Section and Time	1
Learning Area		English		Einstein
Grade Level		Grade 9		9:00 AM - 10:00 AM
Learning Competency		Analyze literary text as expressions of individual or communal values within: diction, tone, and mood, patterns, and motifs, figures of speech, and narrative techniques in the literary “To Kill a Mockingbird” by Harper Lee.		
Learning Objectives <i>What smaller knowledge, skills, or tasks from the competency will learners work on, and what should they be able to show by the end of a session? What content or performance standards are applicable to the session?</i>	Learning Domains	Learning Session 1		
	Cognitive	The students will be able to analyze how diction and sentence structure clarify the sender’s purpose in To Kill a Mockingbird. They will identify the contrast between child and adult vocabulary and differentiate between formal and informal registers to explain how these choices shape the author's message.		
	Psychomotor	The students will be able to demonstrate understanding of tone and mood by reciting passages with appropriate vocal inflection. They will compare sentence structures to show how syntax affects pacing and map out narrative techniques, such as flashbacks, to show how they guide the reader toward the story's meaning		
	Affective	The students will be able to appreciate how a compassionate narrative voice addresses social injustice. They will reflect on the emotional impact of motifs like the "mockingbird" and internalize the value of moral integrity by examining the consistency of Atticus Finch’s tone.		

Learning Resources	Laptop, visual aids, and PowerPoint/Canva Presentation Print/handouts of the short summaries/excerpts from the story/prose "To Kill a Mockingbird." A PDF version of the presentation, as well as handouts or a bulleted lesson outline to the class, via modern online messaging tools (e.g., Messenger, ms teams, etc...).
Self- Check <i>Here are some reminders as I plan my lesson. Was I able to do the following?</i>	☒ Activities are aligned with the objectives ☒ Learning Design Principles are intentionally embedded the Learning Experience ☒ Assessment strategies help me and learners see if the session objectives are met ☒ Experience ☒ Integration strategies have been explored and appropriately embedded in the learning experience ☒ Opportunities for support are present for learners with disabilities and learners with unique contexts
Session	1
Pre- Lesson	Classroom Management • The students will establish physical readiness by clearing their desks of unnecessary items and preparing their copies of the text and notebooks for active annotation. • The students will adhere to discussion norms, ensuring that they listen attentively to the "sender" (the person speaking) and respond with appropriate volume during recitation. • The students will transition from a digital to a physical learning environment by silencing electronic devices used during the previous online session to focus on the interpersonal analysis of the prose. Quick Recap of the Online Reading Assignment • The students will recount the major plot points of the assigned chapters to ensure a shared understanding of the narrative's progression. • The students will identify the primary characters and setting, recalling specific details about Maycomb County that were highlighted during the online discussion. • The students will distinguish between the narrator's age and perspective, acknowledging that the "sender" in the text is an adult Scout reflecting on her childhood experiences.

	• The students will link prior knowledge to the current lesson by transitioning from understanding <i>what</i> happened in the story to investigating <i>how</i> the author's voice creates clarity of purpose and meaning. After the recap, the teacher will lead the "Doomscroll Dialogue" activity to connect modern media consumption to literary analysis. • The Simulation of the Scroll: The teacher will explain the concept of "doomscrolling"—the act of continuously scrolling through bad news or high-intensity social media content. The teacher will act as the "user," mimicking the scrolling motion at the front of the class. • The Performance of Excerpts: As the teacher "stops" on a post, pre-selected students or groups will stand and act out or speak specific excerpts from <i>To Kill a Mockingbird</i>. Each student will use a different Register or Tone to mimic the varied "voices" found on a social media feed (e.g., an "angry comment" voice, a "sad news report" voice, or a "nostalgic influencer" voice). • The Audience Recitation: The rest of the class—the "audience"—will be asked to identify the Tone and Mood of each "post" based on the speaker's delivery and word choice. ○ Teacher Question: "Class, based on the diction and the way the speaker delivered those lines, what is the 'vibe' or mood of this post? Is this sender trying to inform us, or are they trying to make us feel afraid?" • The Synthesis: The students will conclude the activity by reflecting on how social media "senders" use the same tools as Harper Lee to capture attention and convey meaning. ○ Teacher Lead: "Just like when you doomscroll through your feed, the author of this book is trying to get a specific reaction out of you. Today, we will slow down the scroll and analyze the tools she uses to make her message stick."
Learning Experience	Lesson Proper • Making Objectives Clear: ○ The teacher will present a "Target Board" mapping out the elements to be examined: Diction, Style, Tone/Mood, Motifs, Figures of Speech, and POV. • Modeling (I Do): ○ The teacher will perform a "Think-Aloud," analyzing a paragraph from Chapter 1 to show how syntax and imagery create a "tired" atmosphere. • Guided Practice (We Do): ○ The teacher will project excerpts on the board, using "Traffic Light" cards to check student understanding of tone and register in real-time. • Inclusion & Collaboration:

	○ The teacher will use "Tag-Team Recitation," where one student identifies a motif and "tags" a peer to explain its symbolic meaning. ○ The teacher will tailor questions based on student ability, ranging from simple identification to complex thematic analysis. Connection & Reflection ● Past Competency Connection: ○ The students will bridge their previous knowledge of Literal vs. Figurative Language to analyze why the sender chose specific metaphors to clarify meaning. ● Personal Reflection: ○ The students will reflect on the "Doomscroll Mirror," discussing why being a "literary detective" is a vital skill for navigating modern media and avoiding emotional manipulation. ● Check for Mastery: ○ The teacher will use a "Dipsticking" technique (Cold Calling) to ensure all learners can articulate the relationship between the sender's voice and the story's moral purpose.
Opportunities for Integration	English Learning Area & Special Integrations 1. Socio-Linguistic Integration (English & Social Context) ● The Language of Power: The students will examine how Diction and Register are used by the sender to establish social standing within the narrative. ● Recitation Activity: The teacher will lead a comparative analysis of the language used by different characters during the trial scene. The students will be asked: <i>"How does the contrast in formal register used by Atticus Finch versus the informal, non-standard register of Bob Ewell clarify the sender's purpose in portraying social inequality?"</i> ● Objective: The students will conclude that "voice" in English literature is often a reflection of the character's socio-economic environment and level of education. 2. Special Topic: Media Literacy & Critical Thinking ● The "Digital Narrator" Connection: The students will apply their analysis of Tone and Mood to modern digital texts, specifically focusing on how "voices" are constructed in the media they consume daily. ● Recitation Activity: Linking back to the "Doomscrolling" exercise, the teacher will prompt the students to compare the persuasive "voice" of a 1930s town mob to modern-day "viral" outrage in online spaces.

	● Objective: The students will use literary analysis to detect bias and emotional manipulation, recognizing that the "sender's voice" is a tool used by both novelists and digital content creators. 3. Integration of Instructional Technology ● Auditory Style Modeling: The teacher will utilize text-to-speech tools or audiobook excerpts to play the same passage with different vocal inflections. The students will evaluate how the Sound Devices and pacing of the human voice clarify the sender's emotional intent better than a neutral AI voice. ● Interactive Visual Mapping: Using a digital collaborative board, the students will post specific "Diction Clues" found in the text. The students will observe how these words cluster together to form the Patterns and Motifs of the novel. ● UI-Based Literary Navigation: The teacher will project a "Social Media Mock-up" containing quotes from the text. The students will treat these "posts" as modern literature, categorizing them by Style and POV to bridge the gap between classic prose and 21st-century reading habits.
Formative Assessment	Evaluation: Collaborative Creative Activity (Radio Drama) To evaluate mastery, the students will participate in a simplified performance task: "The Voices of Maycomb: A 3-Minute Radio Short." ● The Scope of the Task: ○ Group Formation: The students will work in groups of 5 (Writer, Sound Effects Lead, and 3 Voice Actors). ○ Scene Selection: Groups will choose only one key moment (e.g., Atticus's closing speech or the children's encounter with Mrs. Dubose). ○ Scripting for "Voice": Instead of a full script, the students will complete a "Voice Map" template. They must list 3 specific Diction (g) choices and 1 Motif (j) they intend to emphasize in their dialogue to clarify the sender's purpose. ● Simplified Performance Requirements: ○ The "Live Read" Format: To keep the task doable, the students will perform a "Live Read" at the front of the class using basic classroom objects for sound (e.g., slamming a book for a door, crumpling paper for fire). ○ Focus on Inflection: The students will be graded primarily on their Tone and Mood (h)—specifically, how they use their voices to show the difference between a child's innocence and an adult's seriousness. ● Peer Evaluation (The "Listener's Log"): ○ While one group performs, the other students will act as "Critics." They must fill out a small slip of paper answering: <i>"What one 'tone word' would you use to describe this sender, and which sound device helped you feel it?"</i>

Co-Constructing Support (Student-Teacher Feedback)

To ensure the students do not feel overwhelmed, the teacher will implement these "safety nets":

- **The "Script Starter" Template:**
 - The teacher will provide a pre-formatted script layout. This allows the students to focus on the **content** (diction and style) rather than the **formatting** of a radio play.
- **The "Foley Box" Suggestion List:**
 - The teacher will provide a list of common household items that can be used to create specific **Sound Devices**, making the "Psychomotor" part of the lesson fun and accessible.
- **The "Stop and Ask" Session:**
 - Halfway through the preparation, the teacher will hold a "3-Minute Troubleshooting" per group. The students will tell the teacher: *"We are struggling to make this character sound [angry/sad]. What words should we change?"* This allows the teacher to provide immediate, actionable feedback on their **Diction** choices.

Grade 9 Assessment Criteria (Simplified)

Criteria	5 - Exceptional	3 - Developing	1 - Beginning
Voice & Tone	Changes voice perfectly to show mood and purpose.	Voice is clear but tone stays the same throughout.	Reading is flat; purpose is unclear.
Diction Choice	Uses 3+ specific words from the text to show character.	Uses 1-2 words from the text.	No specific text-based diction used.

	Sound Effects	Sound devices (k) clearly enhance the mood.	Some sounds are used but don't fit the mood.	No sound devices use
	Concluding Reflection and Mastery Check • The "Why We Do This" Reflection: The students will conclude the session by discussing why a radio drama is a "pure" way to study. They will realize that without visuals, the sender's voice is the only tool left to create clarity. • Mastery Check: The teacher will ask the class: <i>"If we turned off the sound and only read the transcript, would the purpose still be clear? Why?"</i> This reinforces the power of Diction and Syntax.			
Extended Learning Opportunities	External Reinforcement Experiences • The "Contextual Eavesdropping" Challenge: ○ The Task: Students are encouraged to visit a public space (e.g., a market, a park, or a local government office) and observe the Register and Diction used by people in different social roles. ○ The Goal: The students observe how a person's "voice" shifts when speaking to a child versus an authority figure, reinforcing the concept of Clarity of Purpose in real-life communication. • The "Digital Voice" Audit: ○ The Task: The students select one "Influencer" or "Content Creator" they follow and analyze three of their videos. ○ The Goal: The students must identify the Tone and recurring Motifs the creator uses to build a brand "voice." This bridges the gap between literary analysis and the media they consume daily. • The "Generational Interview" Project: ○ The Task: The students interview an elder (a grandparent or a community leader) about a significant local event from the past. ○ The Goal: Much like Scout in <i>To Kill a Mockingbird</i>, the students will listen for how the elder's Point of View and nostalgic Diction color the "truth" of the story they are telling.			

Experiences to Stimulate Curiosity and Engagement

To make the learners more curious about the "DNA of prose" before or during the lesson, the teacher can suggest the following:

- **Participation in "Blackout Poetry" Contests:**
 - The teacher provides a page of text (not necessarily from the novel) and asks students to "black out" words until only a few remain to create a new **Mood**.
 - **The Hook:** This allows students to physically see how removing or keeping specific **Diction** fundamentally changes the sender's message.
- **The "Silent Cinema" Experiment:**
 - The students watch a 2-minute movie clip with the sound turned off, then watch it again with the sound on.
 - **The Hook:** This illustrates the power of **Sound Devices (k)** and **Tone**. It sparks curiosity about how "invisible" tools (like audio or specific word rhythms) control their emotions.
- **A Virtual "Maycomb" Map-Making:**
 - Using free digital tools (like Canva or Minecraft), students are invited to build their own visual interpretation of the Radley Place or the Courthouse.
 - **The Hook:** This engages the "world-building" curiosity of Gen Z and Gen Alpha, making them more invested in the **Setting** and the "voices" that inhabit it.

Collaborative Support Check

To ensure these external experiences are accessible, the teacher will ask the students:

1. *"Which of these outside activities sounds most like something you already do in your free time?"*
2. *"Would you prefer a guide/checklist to help you 'eavesdrop' on voices, or would you rather create your own method?"*
3. **Outcome:** The teacher adjusts the "Reinforcement" suggestions based on student interest and their access to digital or public spaces.
