

Name of Teacher				
Learning Area(s)	Reading and Literacy		Section and Time	10:00-11:00
Grade Level	Gr. 1			
Learning Competency	• Chant rhymes and poems. • Segment a two to three syllable word into its syllabic parts. • Identify rhyming words in nursery rhymes, poems, and chants. • Say two or three words that rhyme.			
What competency/ies) from the curriculum are we targeting?				
Learning Objectives	Learning Session 1	Learning Session 2	Learning Session 3	Learning Session 4
	Learners will be able to identify and use naming and describing words to talk about their favorite activities, objects and people at home	Learners will be able to use vocabulary related to the school to narrate personal experiences using naming and describing words	Learners will be able to express ideas about community spaces and write related naming and describing words legibly and correctly	(No need for 4 th session)
Learning Resources	Full sized bond paper	Full sized bond paper	Pictures and videos of local community spaces	
What learning resources will be helpful in reaching our objectives? What materials are available and inclusive? What modalities are accessible to everyone?	Coloring materials/crayons	Coloring materials/crayons	screen for showing pictures/videos	
	Bell/noisemaker for game cues	Map of the school/ checklist of places to visit in school		
	Metacards and markers			

<i>In case of emergency, what alternative resources maybe used?</i>				
Self-Check <i>Here are some reminders as I plan my lesson. Was I able to do the following?</i>	☐ <i>Activities are aligned with the objectives</i> ☐ <i>Integration strategies have been explored and appropriately embedded in the Learning Experience</i> ☐ <i>Learning Design Principle are intentionally embedded the learning experience</i> ☐ <i>Opportunities for support are present for learners with disabilities and learners with unique context</i> ☐ <i>Assessment strategies help me and the learners see if the session the objectives are met</i>			
Session 1				
Pre-Lesson <i>What will I do to make my learners get ready for the lesson?</i>	Ask learners to close their eyes and imagine that they are at home. Ask them to imagine with you. “Kakauwi mo lang galling school, magpahinga muna kayo kahit konti. Ayan nakapagpahinga ka na, ano ang agusto mong gawin?” As they are imagining, distribute a1 full sized bond paper to each learner. Ask them to open their eyes, and draw what activity they were thinking about. Provide the clear following prompts: • What is happening as you do the activity? Are you moving around? Which body part do you use? • Who does it with you? • What objects do you use when you do the activity?			
Learning Experience <i>What activities can I implement to meet the learning objectives?</i> <i>What can I do to:</i> -make objectives clear for the learners? -guide learners before letting them try the task on their own?	When the learners are done drawing, ask them to push the chairs to the sides of the classroom so that the center of the classroom is clear. Ask them to hold onto their drawing. Play the pairing game (similar to “The Boat is Sinking”): give instructions that the teacher will ask learners to look for a partner who shares specific traits from their drawings. Give them 10-15 seconds to find a partner based on: • The same home favorite activity • The same people involve in the activity • The same number of people who do the activity together. • The same time of the day (morning, afternoon or night) As soon as they find a partner, they must tell their partner about their drawing.			

<i>-check the state of the learners' well-being, understanding, and mastery over the lesson?</i> <i>-connect today's new concept to the past competencies?</i> <i>-encourage collaboration among learners?</i> <i>-invite learners to reflect on why this matter happens to them?</i> <i>-ensure inclusion for learners' varied abilities, learning styles and contexts?</i>	When the teacher rings the bell, it's time for the next prompt. Teacher can give 30-45 seconds to share their stories per prompt. Teacher can adjust time for sharing based on engagement of learners and whether most are done sharing. Teacher should provide cues 'Last 10 counts to share your story' or 'Okay, now let your partner tell their story,' to help learner manage their time as a pair. After all prompts are done, have the learners sit on the floor to discuss the persons, activities, feelings, places and objects (naming and describing words) involved in the class's home favorite activities. • Use prepared metacards to note how different words might share the same meaning (e.g. mama, nanay, mommy, inay etc.) or how some words are the same but mean differently to different people (e.g. how "papa" meant "lolo") • For some words, teacher can ask learners to try writing on metacards simultaneously (e.g. according to how they call their mother) • Use one color of metacards for people, another for places, another for animals, another for feelings • Ask learner to tell teacher which color of metacards to use
Opportunities for integration <i>Are there spaces to meaningfully integrate?</i> • <i>another learning area?</i> • <i>a special topic?</i> • <i>technology?</i>	• Math -bar graphs for seeing how many words mean the same thing; one metacard could serve as one unit of measurement
Formative Assessment <i>What task, activity or questions can I use to</i>	During the floor discussion and the pairing game, the teacher circulates to actively listen to the learners' conversations, noting their ability to correctly use naming words (people, objects) and describing words (feelings, time of the day) -this will give the teacher an idea how to organize the last part of the activity (sitting on the floor together and writing the words used)

<i>evaluate learning? What can we do together so that the learners can tell me what kind of support they need from me?</i>				
Extended learning opportunities <i>What experiences outside the classroom can I suggest to learners to reinforce what they have learned? What experiences might make learners more curious engage in this lesson?</i>	Suggest that learners will bring their drawing home to show to their family members and practice describing the activity using the words they learned today. Teacher can also guides for parents so they can replicate the activity at home: here are some questions you can ask your child about their drawing.....'			
Reflecting on my teaching practice				
Notes for myself and peers <i>Is there anything I need to change for tomorrow based on what happened? Is there something the learners are interested in learning? Are there something I would like to share my co-teachers, parents, school leaders about my classroom experience?</i>	Learning Session 1	Learning Session 2	Learning Session 3	Learning Session 4
